Sealed Envelope Mini

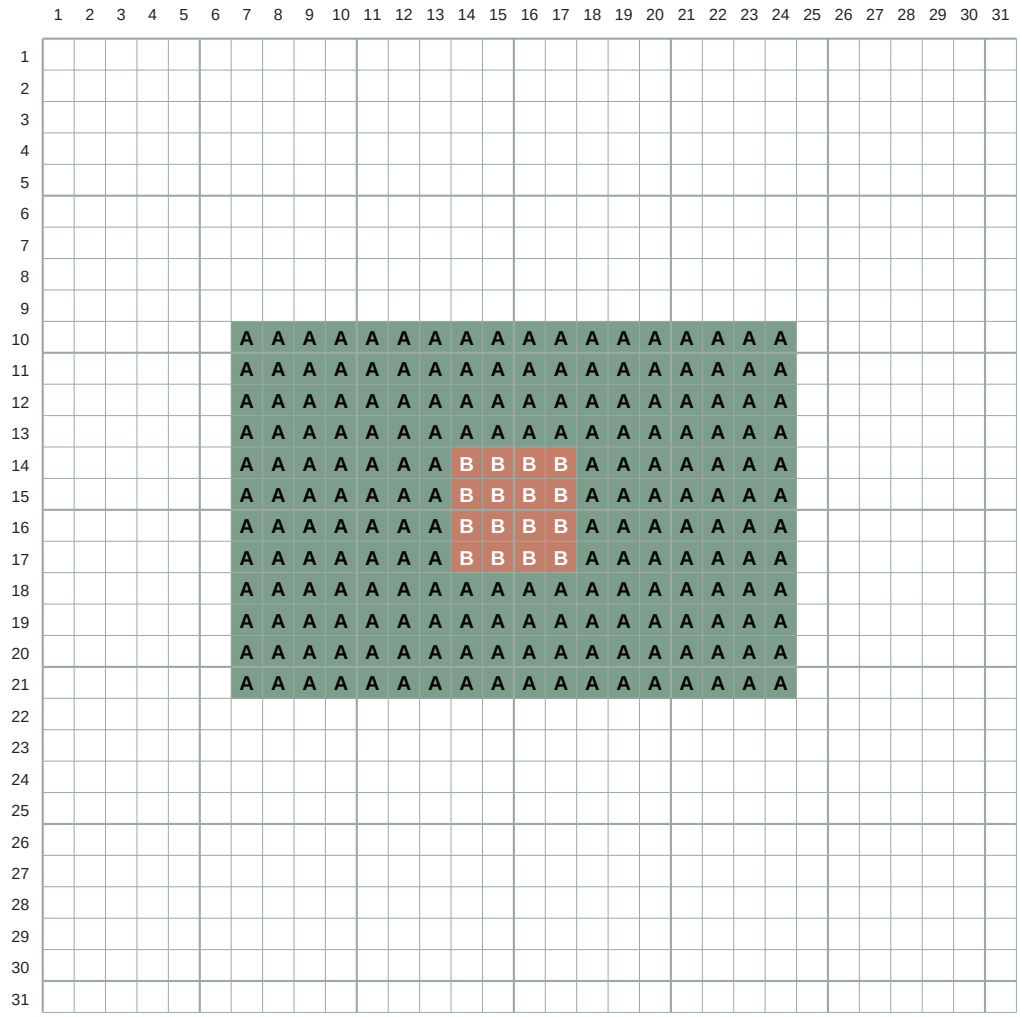

31 x 31 cells | 216 full crosses | 78 backstitches

Page 1: full crosses only. Add the separate backstitch lines from page 2.

Cross symbols A and B are cells, numbered 1-31. Blank cells stay empty.

14-count full grid: 2.21 in / 5.62 cm square
16-count full grid: 1.94 in / 4.92 cm square
18-count full grid: 1.72 in / 4.37 cm square

14-count with 3 in per edge: 8.21 in square. Adjust for your finish.

Backstitch: grid holes

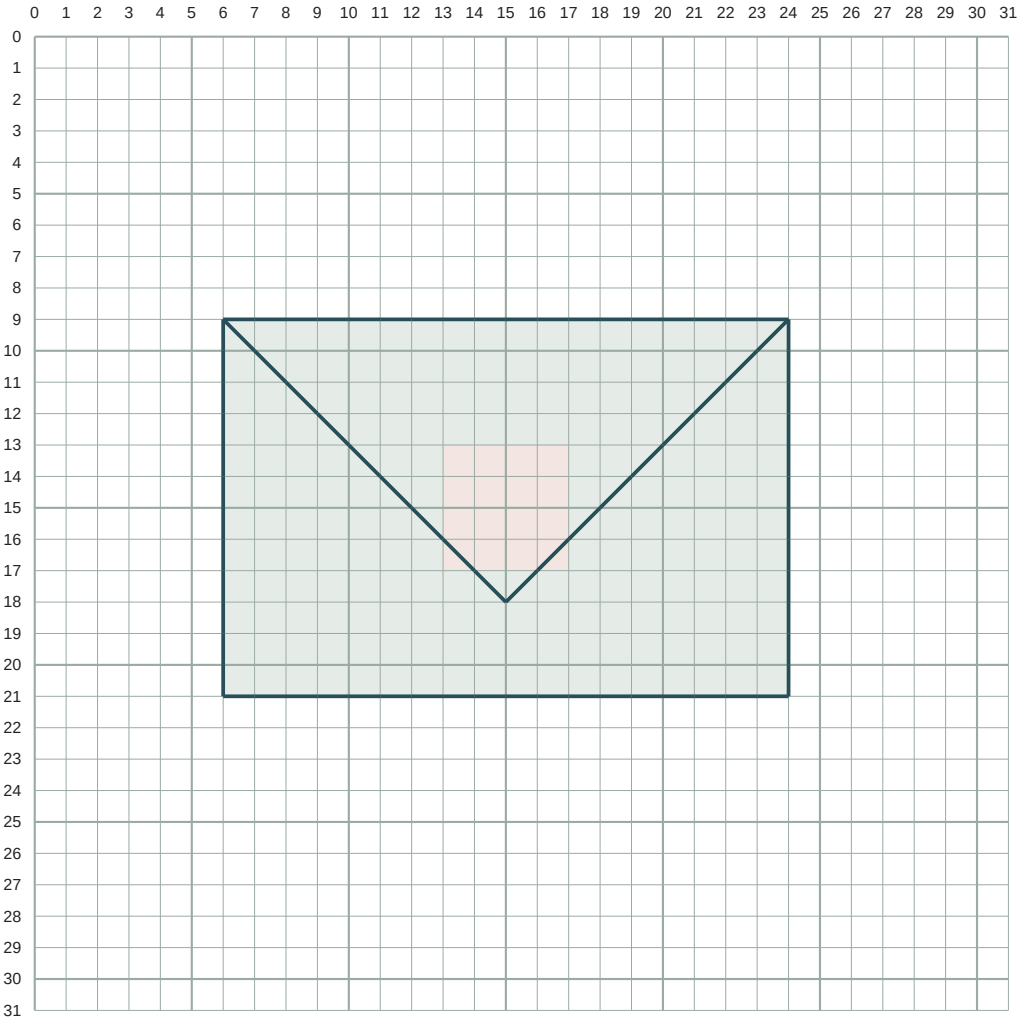

Work crosses first, then use one working strand for the solid lines.

Hole coordinates start at (0,0): x goes right, y goes down.

Each adjacent-hole segment is ONE backstitch, not a full cross.

Insert at every grid hole along the lines, including the diagonal lines.

Pale blocks are cross-stitch reference positions, not additional stitches.

Do not confuse hole (x,y) coordinates with the 1-based cell labels on page 1.

Legend and working order

- A / G01 / #7E9E8C / 200 full crosses / 2 strands
- B / G02 / #C47E69 / 16 full crosses / 2 strands
- Outline / #274F59 / 78 backstitches / 1 strand

Outer rectangle: 60 short stitches

(6,9) -> (24,9) -> (24,21) -> (6,21) -> (6,9)

Left flap: 9 short stitches

(6,9) -> (15,18)

Right flap: 9 short stitches

(24,9) -> (15,18)

Coordinates list the path ends and turns; stitch at every intervening grid hole.

Secure the thread on the reverse. Bring the needle up one hole ahead, then

take it down at the end of the previous visible segment to form backstitch.

Do not replace an entire line with one long stitch. Keep tension gentle.

The rectangle closes once; do not retrace any completed edge.

Full-cross totals exclude backstitch. Outline thread is additional to cross estimates.

All colors are generic swatches, not manufacturer floss numbers.

Test colorfastness and mounting before finishing. Keep fabric margins.

Digital chart and coordinate checks are not physical stitch testing.
